CONTENTS OF VOLUME 3

NUMBER 1

Editoriral 1

ORIGINAL RESEARCH ARTICLES

A Multiblock Partial Least Squares Algorithm for Investigating Complex Chemical Systems
L. E. Wangen and B. R. Kowalski 3

Characterization of the Effect of Peak Shifts on the Performance of the Kalman Filter in Multicomponent Analyses
G. Hartmann Webster, T. L. Cecil and S. C. Rutan 21

Relationships Between Higher-order Data Array Configurations and Problem Formulations in Multivariate Data Analysis
K. H. Esbensen, S. Wold and P. Geladi 33

Statistical *F*-Tests for Abstract Factor Analysis and Target Testing
E. R. Malinowski 49

Chemical Information from Electroanalytical Data. Part 1—Determination of System Parameters for Quasi-reversible Electron Transfer Reactions from Cyclic Voltammetric Test Data and Data for the Reduction of Cerium(IV) Bis(octaethylporphyrinate)
B. Scharbert and B. Speiser 61

Program for Processing of Historical Laboratory Data Based on Fuzzy Set Theory as a Tool for Decision Support
J. Klaessens, J. van Schalkwijk, P. Cox, R. Bezemer, B. Vandeginste and G. Kateman 81

MEETING REPORT 97

BOOK REVIEWS 98

SUPPLEMENT A

Papers presented at the First Colloquium Chemiometricum Mediterraneum held in Barcelona, Spain; 9–11 November 1987
Guest Editors: X. Tomàs and E. Casassas

Editorial 101

Calibration and Confidence Interval: The Minimum Allowable Concentration
M. H. Feinberg 103

Methods of Varimax Rotation in Factor Analysis with Applications in Clinical and Food Chemistry
M. Forina, C. Armanino, S. Lanteri and R. Leardi 115

Optimization of a Chromatographic Analysis in Reversed Phase Liquid Chromatography
S. Heinisch, J.-L. Rocca and M. Feinberg 127

Application of Pattern Recognition to Speciation Data of Heavy Metals in Suspended Particulates of Urban Air
X. Tomàs, J. Rius, J. Obiols and A. Sol 139

Principal Component Analysis Applied to the Study of Successive Complex Formation Data in Cu(II)–Ethanolamine Systems
R. Tauler and E. Casassas 151

Assigning the Origin of Catalan Medieval Stained Glasses by Pattern Recognition Methods of X-ray Fluorescence Data
G. Rauret, E. Casassas, M. Baucells, M. S. Larrechi and F. X. Rius 163

Characterization of Foods by Inexact Rules: The SEXIA Expert System
R. Aparicio 175

SHORT COMMUNICATIONS

The Use of Topological Models in Analytical Chemistry
M. de la Guardia, J. L. Carrión and M. V. Galdú 193

SOL1: a Program for the Simulation of Complex Equilibria using a Personal Computer
A. Izquierdo and J.-L. Beltran 209

Model Selection by the Program MINIGLASS in Complex Formation Studies
A. Izquierdo and J.-L. Beltran 217

A Program for the Simultaneous Potentiometric Determination of Protonation Constants and Electrode Calibration Parameters
J. J. Baeza, G. Ramis and C. Mongay 223

Sequential Probability Ratio Test for Evaluating Functionality in Acid–Base Potentiometry
M. C. Ortiz, L. A. Sarabia and J. L. Palacios 231

Multivariate Calibration in UV–Vis Spectroscopy
C. Pizarro, L. A. Sarabia and J. L. Palacios 241

Use of a Linear Function of Several Variables in Simplex Optimization as a Procedure for Assessing Analytical Versatility in FIA
J. Alonso, J. Bartroli, M. del Valle, A. A. S. C. Machado and L. M. A. Ribeiro 249

An Empirical Model for Fitting Chronopotentiometric Data Through the use of Dummy Variables
M. C. Garnica, J. L. Palacios and L. A. Sarabia 257

Structure Modelling and Discrimination of Catalan White Wines
M. S. Larrechi, M. R. Franques, M. Ferre and F. X. Rius 261

Dynamic Headspace Analysis: Optimization of Titration by Experimental Design
T. Talou, L. Rigal and A. Gaset 275

Application of the Powell Method to the Optimization of Flow Injection Systems
M. del Valle, J. Alonso, M. Poch and J. Bartroli 285

Pattern Recognition in Clinical Chemistry: Tumor Markers
S. Lanteri, P. Conti, A. Berbellini, G. Centioni, A. Polzonetti, R. Marassi and S. Zamponi 293

Principal Component Analysis and Pollution by Trace Elements in a Mussel Survey
L. Favretto and L. G. Favretto 301

Use of Meteorological Data to Identify Emissor Sources of Pollutants
N. Ferrer 309

Chemometric Aspects of an Environmental Study
R. Pardo, E. Barrado and Y. Castrillejo 315

Chemometric Methods in Analytical Research: a Program of Practical Study
A. Colina, M. C. Garnica, J. L. Palacios, M. C. Ortiz, C. Pizarro and L. A. Sarabia 323

NUMBER 2

ORIGINAL RESEARCH ARTICLES

The Performance of Least Squares and Robust Regression in the Calibration of Analytical Methods under Non-normal Noise Distributions
R. Wolters and G. Kateman 329

Principal Components Regression for Routine Multicomponent UV Determinations: a Validation Protocol
P. J. Gemperline and A. Salt 343

Use of Replication and Signal-to-noise Ratios in the Identification and Estimation of the Composition of Lubricant Basestock Mixtures Using ^{13}C Nuclear Magnetic Resonance Spectroscopy and Projection into Principal Component/Canonical Variates Space
J. M. Deane, H. J. H. MacFie and A. G. King 359

A Non-parametric Class Modelling Technique
M. P. Derde, L. Kaufman and D. L. Massart 375

Dried Grass Silage Analysis by NIR Reflectance Spectroscopy—a Comparison of Stepwise Multiple Linear and Principal Component Techniques for Calibration Development on Raw and Transformed Spectral Data
G. Downey, P. Robert, D. Bertrand and M.-F. Devaux 397

Variance-decomposition of Pure-component Spectra as a Measure of Selectivity
J. H. Kalivas 409

Can Image Analysis Provide Information Useful in Chemistry?
P. Geladi and K. Esbensen 419

The Wavelength Component Vectorgram: a Tool for Resolving Two-component Fluorescent Mixtures
D. S. Burdick and X. M. Tu 431

Condition Numbers, Iterative Refinement and Error Bounds
J. H. Kalivas and P. Lang 443

BOOK REVIEW 451

ANNOUNCEMENTS 453

PRODUCT NEWS 453

NUMBER 3

ORIGINAL RESEARCH ARTICLES

Evolving Factor Analysis Applied to Flow Injection Analysis Data
P. J. Gemperline and J. C. Hamilton 455

Classification: Oldtimers and Newcomers
I. E. Frank and J. H. Friedman 463

Testing for Redundancy in Product Quality Control Test Criteria: an Application to Aviation Turbine Fuel
J. M. Deane and H. J. H. MacFie 477

An Improved Algorithm for the Generalized Rank Annihilation Method
B. E. Wilson, E. Sanchez and B. R. Kowalski 493

PLS Response Surface Optimization: the Carso Procedure
S. Clementi, G. Cruciani, C. Curti and B. Skagerberg 499

Expert System for the Characterization of the Laboratory Sample Input Signals: AUTOCORR
P. Mijland, J. Klaessens, B. Vandeginste and G. Kateman 511

Calibration: Regression Models for Concentration Problems
H. J. Ruskin 529

SHORT COMMUNICATION

Display Aspects in Hierarchical Clustering
A. Henrion, R. Henrion and G. Henrion 537

SOFTWARE REVIEW 541

BOOK REVIEWS 543

NUMBER 4

Editorial 547

REVIEW ARTICLE

Mixture Analysis using Factor Analysis I: Calibration and Quantitation
P. J. Gemperline 549

ORIGINAL RESEARCH ARTICLES

Mechanism of the Hydrolysis of Adenosine 5′-Triphosphate: a Regression Analysis of Kinetic Data
D. B. Hibbert and J. P. B. Sandall 569

Multivariate Response Surface Modelling by Principal Components Analysis
N. Bratchell 579

Discriminant Principal Components Analysis
P. W. Yendle and H. J. M. MacFie 589

Multicomponent Determinations by a Membrane-discriminated Gas Phase Analyzer and Successive Regression in the Fiduciary Region
K. Petersen, J. L. Lopez and P. K. Dasgupta 601
